SUMMARY

Hold a degree in System Development and possess broad experience in Quality Assurance and QA best practices.

I have been responsible for designing and implementing QA test strategies, including both functional i.e. Component test, System Test, System Integration Testing (SIT), End-to-End, UAT and Regression testing, etc. and automated testing processes aligned with DevOps practices. My expertise includes leading and testing complex systems such as taxi booking systems, ETL processes, Customer Relationship Management (CRM) platforms, Order Management and Billing systems, as well as mobile applications. My professional background demonstrates a strong capability to ensure software quality and reliability through strategic testing approaches and technical proficiency across diverse platforms.

As a person, I am responsible, self-driven, productive, structured, goal oriented, ability to identify quality shortcomings, committed to delivering on time and quality solutions. Also, I am social, curious to learn, seek new challenges, down-to-earth, cooperate with everyone for the team's best and speak Swedish and English.

EXPERIENCE

Consultant | SIGMA TECHNOLOGY SYSTEMS AB, Stockholm

08/2022 – Present

Consultant | SIGMA TECHNOLOGY SYSTEMS AB, Stockholm

01/2026 – Present

- Completed training in Artificial Intelligence (Azure AI), DevOps, Linux Administration on Azure, Project Management, Agile/Scrum methodologies, Selenium and Python test automation , including:
    - Introduction to AI in Azure
    - DevOps Foundations: The Core Principles and Practices
    - Deploy and Administer Linux Virtual Machines on Azure
    - Project Management Course
    - Agile Project Management + Scrum: Step by Step with Examples
    - Software Testing Foundations Test Strategy
    - Planning and Releasing Software with Jira
    - Business Analysis Essential Tools and Techniques
    - Building KPIs for Data-Driven Strategy
    - Python Automation and Testing
        - Tools utilized include: Selenium, Python, BeautifulSoup, Google Colab
    - Python for non-programmers
    - Practical HTML for No-Coders
        - Tools utilized include: Codepen
    - Practical CSS for No-Coders
        - Tools utilized include: Codepen

Test Specialist | CABONLINE GROUP, Stockholm

07/2024 – 12/2025

- Develop and execute User Acceptance Testing (UAT), Risk-based Testing and Regression Testing for Cabonline services.
- Validate test results to confirm that the services meet functional requirements.
- Ensure the reliability and functionality of the taxi booking systems.
- Conduct tests on a specialized test bench designed to simulate real-world driving conditions.
- Implement testing metrics to monitor test progress, provide test status overviews and validate test coverage to maintain high-quality standards.
- Tools utilized include Jira and more.

Quality Assurance Tester | SIGMA TECHNOLOGY SYSTEMS AB, Stockholm
04/2024 – 07/2024

- Conduct system and end-to-end testing for the Go Connect web portal in accordance with Azure DevOps and the Scrum framework.
- Analyze work items, develop and execute test cases, and validate them.
- Ensure the portal's functionality, performance, and quality standards are met.
- Tools utilized include AzureDevOps and more.

Quality Assurance Lead | TELENOR SVERIGE AB, Stockholm
08/2022 – 03/2024

- Develop, implement a comprehensive QA test strategy, including testing approach, processes, bug management, and coach testing resources for effective implementation.
- Collaborate with the test automation leader to develop automated testing process aligned with the overall QA test strategy.
- Plan testing resources for system integration and end-to-end testing. Oversee quality assurance activities across teams per release following DevOps practices.
- Validate the quality and effectiveness of testing processes to maintain high standards of software quality assurance.
- Evaluate key performance indicators (KPI) such as DORA metrics to ensure continuous improvement across organizational processes.
- Participate in release meetings to review release progress and quality checks to ensure Proper Approval Processes (Go-No Go decision) for Deployments.
- Tools utilized include Jira, Remedy, Jenkins, GitHub, SonarQube, Postman and more.

Quality Assurance Tester | INFORMATION DELIVERY SYSTEMS SWEDEN, Stockholm
06/2018 – 07/2022

- Requirement analysis for new features in ETL processes.
- Perform manual system testing and end-to-end execution for iServ's Windows and web portal clients, following Agile methodologies.
- Development of test cases, test data preparation, validation of test results, and defect tracking using Jira.
- Managing test environments, including backing up and snapshots. It also includes installing updates and deploying Windows and web applications to test environments during testing.
- Troubleshoot problems with developers and stakeholders to find solutions.
- Tools utilized include VMware, Oracle, Linux, SQL Developer and more.

Process Analyst | TELIA SVERIGE AB (TATA CONSULTANCY SERVICES), Stockholm
08/2017 – 12/2017

- Execute deployment activities related to copper and fiber internet products for Enterprise customers.
- Manage order processing, troubleshoot orders, to ensure seamless service delivery.
- Tools utilized include TELSIMS, TAD, NMS, HERA and more.

Self Employed | TOURISIM, Havana
01/2012 – 06/2017

Test Manager and Country Solution Engineer | VODAFONE GLOBAL, Düsseldorf
02/2008 – 10/2010

- Supervise a team of six members responsible for testing mobile music applications for Vodafone's music portal services.
- Perform functional and friendly user testing to ensure the applications work properly and meet quality standards.
- Manage defect reports for music portal services using HP Quality Centre to track and resolve issues.
- Facilitate collaboration between RealNetworks, a leading music provider, and Vodafone to ensure service integration across international markets.
- Coordinate, test, and support the deployment of music portal services.
- Tools utilized include ER Core Stack and more.

Quality Assurance Tester/Component Tester | TELEFONICA O2 GERMANY, Munich
10/2001 – 12/2007

- Execute System Integration Testing (SIT), End-to-End, and Regression testing of PeopleSoft Customer Relationship Management (CRM), Arbor (Order Management/Billing Platform), Fraud Detection, and Collections systems.
- Development of Component Testing and User Acceptance Testing test cases aligned with new feature specifications derived from mobile business requirements associated with the Arbor billing system.
- Verify the test results in accordance with the Rational Unified Process (RUP) methodology.
- Tools utilized include HP Unix, Solaris, Sybase and more.

Billing Test Analyst | MCI WORLDCOM, London
07/2000 – 09/2001

- Analyze the business requirements related to fixed-line customers.
- Conduct System and User Acceptance Tests (UAT).
- Ensure that new features are integrated into the Arbor billing system.
- Tools utilized include HP Unix, Oracle, Sybase, Rapid SQL and more.

Billing Test Analyst | IPULSYS MANNESMANN, The Hague
02/2000 – 07/2000

- Development of operational acceptance test documentation as to business requirements.
- Execute test scripts across multiple systems i.e., Siebel Customer Care and Arbor (Order Management/Billing).
- Ensure system functionalities meet organizational standards and client expectations.

Billing System Tester | INTEROUTE DEUTSCHLAND TELECOM GmbH, Frankfurt
06/1999 – 01/2000

- Development of test documentation.
- Execution of system testing.
- Ensure that new features are integrated into the internal billing platform.
- Tools utilized include Microsoft SQL and more.

Lotus Notes System Developer | CAP GEMINI (TELIA PROSOFT AB), Stockholm
10/1997 – 06/1999

- Develop Lotus Notes applications.
- Perform system, end-to-end and regression tests.
- Ensure apps functionality.
- Tools utilized include Lotus Notes.

System Developer and System Tester | ERICSSON RADIO SYSTEMS AB, Stockholm
12/1996 – 09/1997

- Develop Client/Server applications utilizing JavaScript and Sybase.
- Conduct system tests.
- Ensure the reliability of Internet-based applications.
- Tools utilized include Intra builder, HP Unix, Sybase and more.

EDUCATION

Bachelor of Social Science with major in Informatics | Umeå University, Sweden

SKILLS

- Test Planning & Strategy
- Test Management (Jira, Zephyr)
- Defect Tracking & Bug Reporting (Jira, Azure DevOps)
- Metrics & Reporting (Dashboards, KPIs)
- Database Testing (SQL, ETL testing, HP Unix)
- API Testing (Postman)
- Shift-left testing
- Exploratory Testing
- Agile / Scrum / Kanban
- Release Management
- Defect Management
- Team Leadership
- Manual Testing
- Agile/Scrum testing practices
- Functional Testing
- Risk-based Testing
